## Students Successful Stories

### Arthur Kung

It was 2012 when I joined Shrewsbury School at sixth form, studying Maths, Further Maths, Physics and Chemistry at A-levels. Throughout my time at Shrewsbury, I was given lots of opportunities to explore my talents. One of such was representing UK in the International Young Physicists' Tournament in the Lower Sixth, which involved performing experiments to investigate physical phenomena. I also enjoyed the variety of Mathematics competitions at Shrewsbury. These activities sharpened my mathematical skills and prepared me for university. In addition, Shrewsbury enabled me to live a balanced lifestyle by empowering me to participate in various activities in sports, music and art. It was a precious memory to play football for my house, Rigg's Hall.

For my undergraduate studies, I read Mathematics at Emmanuel College, University of Cambridge. After graduating with first class honours, I continued my studies in MSc Risk Management and Financial Engineering at Imperial College London.

## Students Successful Stories

### Ian Yeung

My life at Shrewsbury was certainly very fruitful and rewarding. From the very first day of arrival, I received the warmest welcome from both my housemaster and the rest of the Rigg's cohort. I immediately felt the togetherness of the house, particularly during house competitions like First House football.

Teachers were more like mentors as opposed to academic staff, who inspired me to pursue a degree in Physics and enlightened my natural curiosity for science. Taking part in the International Young Physicists Tournament was certainly the highlight of my academic studies. The school's encouraging and supportive culture definitely played a part in my later success with University, the after class Oxbridge preparations were not only inspiring but also served as a solid platform for me to develop the necessary skills and learning appetite to succeed in University.

Outside of the classroom, I also had the pleasure to play the highest standard of football in my life with the school's 1st and 2nd XI. Match-day fixtures on Wednesdays and Saturdays are days one looks forward to during the week. I still miss all the long journeys on the team coach and team meals for away match fixtures!

### Mercury Cheung

Back in 2009, there was only one girls' house at Shrewsbury and that was Mary Sidney Hall. In MSH, there were 60 girls, we shared a room in the Lower sixth while in the Upper Sixth, I enjoyed a single room. It is always good to live with someone when you are in a new environment, and after a year, a bit more privacy allow you to concentrate on the A Level exams. This supportive atmosphere enabled me to reach my potential and achieve high A level grades in Mathematics, Chemistry, Economics and Physics.

The bonding of Shrewsbury students is strong, so I still have contact with my Shrewsbury friends though we are miles apart now. For the Hong Kong Salopians, we have dinner gatherings regularly. I've heard someone said your high school friends are going to be your life-long friends, and I guess that's true.

After I graduated from Shrewsbury, I got an offer from HKUST to study BBA and after that, I did a master degree in Communication in HKBU. The transition from Shrewsbury to joining HKUST went very smoothly. Now I am a research writer for a free TV Channel in Hong Kong. Studying at Shrewsbury definitely broadened my horizons and helped me with my career choices. I made some wonderful friends there and I could develop my own interests in football and journalism. These interests are very helpful for my current career.
